- Hindi
- Telugu

CERTIFICATES

Web Designing Course, Jeyram Education Trust (PMKVY)

Diploma in Information Technology, SRC INFO School

Course on Full-Stack (MERN)

Ongoing

PROJECTS

Wild Motions – Car Collection Website

- Developed a modern car showcase platform using React.js with reusable components and **dynamic rendering**. Implemented state management using hooks, routing, **theme switching** (dark/light mode), and responsive UI design. Focused on component-based architecture and interactive user experience.

Zo-Zone Pizza Website

- Developed a responsive pizza ordering website with interactive UI components and **smart order calculation**. Integrated FAQ **chatbot**, **animated elements**, and **social media connectivity** for improved engagement.

Vote Eligibility Checker

- Created a simple JavaScript-based application that checks voter eligibility based on age using conditional logic. Built as a beginner-level project to demonstrate **core JavaScript** concepts.

Chatbot Trichy

- Designed an **NLP**-based tourist assistance chatbot to help visitors explore local attractions and services. Implemented natural language processing to provide interactive and informative travel guidance.

Titan Strength

- Designed a modern fitness website with **parallax scrolling effects** and interactive sections. Implemented responsive layouts using **media queries**, JS and Bootstrap to ensure smooth experience across all devices.

Cosmetic suggestion based on skin condition using machine learning

- Developed an AI system using image processing to detect skin types (Oily, Dry, Normal) and provide personalized cosmetic recommendations.

Melody Stream(Django Frontend Spotify Simulation)

- Built a frontend-only music player interface using Django templates, inspired by modern music streaming platforms. Designed a responsive UI with playlist layout, album display, and basic player controls. Focused on clean design and user experience.
